Curriculum Overview

Three progressive phases — each building on the last

CLASS STRUCTURE

Every 2-hour session
follows a proven rhythm

0–30 min

Concept demo

30–100 min

Hands-on coding

Review & Q&A

Weekly Project Cadence

Each week ends with a concrete, portfolio-ready deliverable

Phase 1

- W1: CLI expense tracker (plain PHP)
- W2: Static portfolio — routes & Blade
- W3: Blog with categories (Eloquent)
- W4: Full blog CRUD + image upload

Phase 2

- W5: Multi-role auth + JWT/OAuth app
- W6: REST API with Swagger docs
- W7: Email queue notification system
- W8: Full test suite (PHPUnit + Pest)

Phase 3

- W9: Refactor to service-repository
- W10: Performance audit & hardening
- W11: Deploy to cloud + CI/CD pipeline
- W12: Capstone SaaS micro-app — demo day

Phase 1 — Foundations

Month 1 · Weeks 1–4 · PHP · Git · MVC · Blade · Eloquent

W1–W4

Week 1: Dev environment & PHP fundamentals

C1

Setup & PHP basics

PHP 8.2, Composer, VS Code, Git, variables, control flow, functions

C2

OOP in PHP

Classes, objects, constructors, inheritance, interfaces, type hints

C3

Modern PHP & Git workflow

PHP 8 features, match/named args, Git branching, GitHub

Week 2: Laravel installation & MVC

C4

Laravel project setup

Composer install, project structure, .env, Artisan CLI

C5

Routing & controllers

Named routes, parameters, resource controllers

C6

Blade templating

Layouts, @extends/@yield, directives, components & slots

Week 3: Eloquent ORM & databases

C7

Migrations & schema

DB config, schema builder, indexes, rollback

C8

Models, seeders & factories

CRUD operations, factory classes, test data

C9

Eloquent relationships

hasMany, belongsTo, BelongsToMany, eager loading

Week 4: Forms, validation & file handling

C10

Forms & CSRF

Form creation, CSRF protection, old input, method spoofing

C11

Validation

Rules, Form Request classes, custom messages

C12

File uploads & storage

Storage disks, upload handling, image management

Phase 2 — Core Laravel

W5–W8

Month 2 · Weeks 5–8 · Auth · JWT · OAuth · APIs · Swagger · Queues · Testing

Week 5: Authentication & authorization

- C13 Laravel Breeze + session auth**
Auth scaffolding, registration, login, email verification
- C14 Gates, policies & RBAC**
Policy classes, Spatie Laravel Permission, role middleware
- C15 JWT implementation**
JWT tokens via tymon/jwt-auth, token lifecycle, refresh tokens
- C16 OAuth 2.0 & social authentication**

Week 6: RESTful APIs & API resources

- C17 API routes & controllers**
Stateless controllers, JSON responses, HTTP status codes
- C18 API resources & Sanctum**
JsonResource, ResourceCollection, token auth, pagination
- C19 API documentation with Swagger**
Swagger/OpenAPI via L5-Swagger, annotations, try-it-out UI

Week 7: Queues, jobs & events

- C20 Queues & jobs**
Database/Redis queues, dispatching, delays, retries
- C21 Events & listeners**
Event/listener classes, registration, broadcasting
- C22 Notifications & mail**
Mailables, Slack/SMS channels, queued notifications

Week 8: Testing in Laravel

- C23 PHPUnit & feature tests**
RefreshDatabase, HTTP assertions, JSON assertions
- C24 Unit tests & mocking**
Testing models/services, Mockery, faking queues/mail
- C25 Pest PHP & TDD intro**
Pest syntax, expectations, TDD workflow, code coverage

Phase 3 — Production Ready

W9–W12

Month 3 · Weeks 9–12 · Architecture · Performance · Security · DevOps · Capstone

Week 9: Advanced Eloquent & service layer

- C26** **Advanced Eloquent**
Query scopes, accessors/mutators, observers, full-text search
- C27** **Service & repository pattern**
Service classes, repository interfaces, DI in depth
- C28** **Caching strategies**
Redis/Memcached, cache tags, remember/forever, HTTP caching

Week 10: Performance & security

- C29** **DB optimization**
Telescope/Debugbar, indexes, N+1 deep dive, chunking
- C30** **Security best practices**
XSS/CSRF/SQLi defense, mass assignment, OWASP top 10
- C31** **Horizon & Octane intro**
Queue monitoring, Swoole/RoadRunner, scaling considerations

Week 11: Deployment & DevOps

- C32** **Server setup & Forge**
Nginx + PHP-FPM, Laravel Forge, SSL with Let's Encrypt
- C33** **CI/CD with GitHub Actions**
Workflow files, test on push, deploy on merge, secrets
- C34** **Docker basics for Laravel**
Docker Compose: app, nginx, mysql, redis containers

Week 12: Capstone & career prep

- C35** **Capstone build sprint**
Student project builds with instructor-guided code review
- C36** **Code review & polish**
Peer reviews, README writing, Scribe API documentation
- C37** **Demo day & career roadmap**
Live demos, Laravel ecosystem map, portfolio & next steps

Ready to build industry-ready developers.
